

*Botanical name*

# CERCIS CANADENSIS 'FOREST PANSY'

## PURPLE LEAF EASTERN REDBUD

*Common name*

## ABOUT

### MATURE HEIGHT

6 metres

### MATURE SPREAD

6 metres

### FLOWER COLOUR

Masses of small pink pea shaped flowers borne in groups along the branches in spring.

### DESCRIPTION

An open low branching tree that forms a flat-topped canopy. Foliage is reddish purple when emerges changing to a deep purplish black and then finally fading to a purple green in summer. Foliage changes to yellow and orange in autumn.

### ENVIRONMENTAL REQUIREMENTS

Prefers moist well drained soils and is suitable to a wide range of soils but does not withstand long periods of wet or dry soil conditions. Plant in full sun with afternoon shade in summer.
