

FACT SHEET

– Recycling Services A 240L, (or) 360L Yellow Lidded Recycling Bin

(02) 4677 1100
wollondilly.nsw.gov.au

The yellow lidded bin is for recyclable items only and is collected fortnightly. Recyclables are taken to a Materials Recovery Facility.

Residents can have a 240L or 360L recycle bin or multiples of these. Call the Waste Hotline on 1800 805 305 to order new bins or replace bins.

Fees and Charges for the waste service are [here](#).

What can I put in my yellow bin?

Items such as paper and cardboard, plastic bottles, containers and trays (Polymers 1-7), Plastic plates, cutlery and cups, aluminium cans, steel cans and tins, glass jars and bottles, milk and juice cartons.

What can't go into my yellow bin?

No plastic bags, ceramics or plate glass, hazardous waste, paints or oils, no medical waste or syringes, no car parts, gas cylinders, coat hangers or electrical appliances, clothing or shoes, general waste.

RECYCLING COLLECTION SERVICE

The 240 litre and 360 litre yellow lidded recycle bin is collected fortnightly. Customers are able to purchase additional services through Council if your current bin size isn't sufficient, these additional services are levied through the rates system.

For more information about how to recycle, visit www.wollondilly.nsw.gov.au

Accepted Items (Green Checkmark)	Not Accepted Items (Red X)

Glass jars and bottles	No clothing or shoes
Milk and juice and bottles (tins, pails and liquid paperboard)	General Waste

240L, 360L
Recycling Bin

Syringes used for medical purposes can be disposed of at numerous pharmacies in the local area. Please see information in this booklet about which pharmacies participate.

Where does my yellow bin material go?

Trucks take residents recycling to a MRF (Materials Recovery Park) at Jacks Gully, Spring Farm.

At the facility, workers remove large items that cannot be recycled by hand before the material goes through an automated separating system.

Workers however have tonnes of material to sort every hour so cannot remove everything that shouldn't be there. This material which shouldn't be in the recycling is called contamination.

The contaminated material left over which can't be recycled is sorted again and baled into large bricks. This is used a fuel overseas and is not wasted.

If you have recently moved or have large volumes of cardboard waste or more recyclables than your yellow bin can handle, you can take them to Bargo Waste Management Centre where you can dispose of them for free.

Businesses that require larger waste storage capacity and bulk recycling collections should discuss their waste management needs with a private waste collection contractor. These can be found in the Yellow Pages Phone Directory.
