TRIM 1022-3

## EXECUTIVE SUMMARY

- This report provides details of Council's invested funds as at 31 March 2016.
- It is recommended that the information and certification in relation to the investment of Council funds as at 31 March 2016 be noted.

## REPORT

At its last meeting, the Reserve Bank left the cash rate at $2.00 \%$. In relation to the domestic market, the Board of the Reserve Bank commented that:
"In Australia, the available information suggests that the economy is continuing to rebalance following the mining investment boom. Consistent with developments in the labour market, overall GDP growth picked up over 2015, despite the contraction in mining investment. The pace of lending to businesses has also picked up.

Inflation is quite low. Recent information has confirmed that growth in labour costs remains quite subdued. Given this, and with inflation also restrained elsewhere in the world, inflation in Australia is likely to remain low over the next year or two.

Given these conditions, it is appropriate for monetary policy to be accommodative. Low interest rates are supporting demand, while supervisory measures are working to emphasise prudent lending standards and so to contain risks in the housing market. Credit growth to households continues at a moderate pace, albeit with a changed composition between investors and owner-occupiers. The pace of growth in dwelling prices has moderated in Melbourne and Sydney and has remained mostly subdued in other cities.

The Australian dollar has appreciated somewhat recently. In part, this reflects some increase in commodity prices, but monetary developments elsewhere in the world have also played a role. Under present circumstances, an appreciating exchange rate could complicate the adjustment under way in the economy."

Council will continue to monitor and review the portfolio while liaising with our investment advisors, to ensure that returns are maximised and risk exposure is minimised.

As shown in the following chart, the credit rating on Council's portfolio as at 31 March 2016 is within Council's investment policy limits.

## GO2 - Investment of Funds as at 31 March 2016

The vast majority of Council's investment portfolio (96\%) is invested in deposits / securities with Australian Authorised Deposit taking Institutions (ADI's). Council has been taking advantage of term deposit "specials" from various institutions without overexposing the portfolio to any one institution.

The marked to market valuations on some of the direct investment products in Council's portfolio remain at less than the face value of the investment. The marked to market value of these investments is expected to be equal to or greater than the face value by the time they reach their maturity date. Early exit from these products would realise losses.

The following chart compares Council's portfolio yield with the benchmark AusBond Bank Bill Index rate in each month for 2014/15 and 2015/16.

As shown in the chart above, Council's portfolio yield has continually exceeded the benchmark AusBond 3 month Bank Bill Index due to the prudent investment of Council's portfolio. For March 2016, Council's portfolio yielded $3.33 \%$ compared to the benchmark's $2.36 \%$ pa return.

Under Reg 212 of the Local Government (General) Regulation 2005, Council's Responsible Accounting Officer must provide Council each month with a written report setting out details of all money that Council has invested under section 625 of the Act.

Details of Council's investment portfolio as at 31 March 2016 are provided in attachment 1.

## Consultation

Independent advice regarding the investment of Council funds was provided by Prudential Investment Services Corp.

## FINANCIAL IMPLICATIONS

Interest earned is allocated to restricted cash and income in accordance with Council's adopted budget, policy and legislative requirements.

The following chart compares the actual and predicted interest for 2015/16 with the prior year's interest income.

Council's investment income for 2015/16 is expected to be higher than the income received for $2014 / 15$. While interest rates on investments remain low Council's current portfolio base is higher than expected as some major projects projected for 2015/16 have not yet commenced.

The prudent investment of funds is necessary to ensure Council's long term financial sustainability.

## CERTIFICATION

I hereby certify that Council's investments have been made in accordance with Sec 625 of the Local Government Act 1993, clause 212 of the Local Government (General Regulations) 2005 and Council's Investment Policy.
